SOURCE Kraanaya Tatariya.TATAR ASSR PROGRESSING SLOWLY

Workers of Tatar ASSR are striving to fulfill the postwar Five-Year Plan. Local industry enterprises of the Tatar ASSR have successfully completed their 1949 plans. The 1949 year plan for gross production was met by 104 percent. As a result, 1,043,000 rubles' worth of production above plan were obtained.

Local industry would have been even more successful if all workers had attained high work standards. However, certain enterprises are still technologically backward and slow in introducing new working techniques. Occasionally, products are of low quality, and no effort is made to save raw materials, material stocks, electric power, and fuel. Furthermore, 21 enterprises have not fulfilled the 1949 plan. The 6-month plan for 1950 fell 751,000 rubles short of completion.

In connection with the work being done to expand small kolkhozes, the construction of new villages and the installation of a wide network of electric power plants are progressing on a large scale. The time has come when local industry must be set up on a large-scale basis. All rayons are to have their own industrial combines. Productive equipment for building material in each combine is to be mechanized.

Tatar ASSR and Udmurt ASSR started a socialist competition according to the following agreement: (1) each kolkhoz and sovkhov is to exceed its plan for feed storage for general livestock purposes, and (2) prior to the beginning of the grain harvest, all kolkhozes and sovkhovs are to complete hay cutting and to fulfill the plan for ensilage by not less than 30 percent in Tatar ASSR and 100 percent in Udmurt ASSR. On 20 July, Tatar ASSR was ahead of Udmurt ASSR (71 to 70 percent) in hay cutting, but Udmurt ASSR was ahead in storing ensilage (61 to 55 percent).

In field work, Tatar ASSR has pledged that each 15-horsepower tractor work an average of not less than 650 hectares, while Udmurt ASSR has pledged an average of not less than 600 hectares. On 20 July, Tatar MTS averaged 80 hectares more work per tractor than Udmurt MTS (360 hectares to 280 hectares).

Following is a summary of haycutting and ensilage storage progress in Tatar ASSR kolkhozes on 20 July 1950 (in percent of plan).
